Amendments to the Claims:

This listing of claims will replace all prior versions and listing of the claims in the application.

Listing of Claims:

1. (Original) A method of relieving dizziness in a patient comprising the steps of:

mounting a non-invasive nerve stimulation device onto the ventral side of the wrist;

generating a stimulation signal; and

delivering the stimulation signal to the ventral side of the wrist.

2. (Original) A method of relieving dizziness in a patient comprising the steps of:

mounting at least one electrode onto the ventral side of the wrist;

generating a stimulation signal; and

delivering the stimulation signal to said at least one electrode to stimulate the ventral side of the wrist.

3. (Original) The method of claim 2 wherein said mounting step includes providing a wristwatch-like housing carrying the electrodes, and providing securing means for mounting the housing onto the wrist, with the housing having a circuit means for generating the stimulation signal encased within the housing.

- 4. (Original) The method of claim 2 wherein said delivering step comprises delivering an intermittent stimulation signal.
- 5. (Original) The method of claim 2 wherein said delivering step comprises delivering continuous stimulation signal.
- 6. (Currently Amended) A method of relieving dizziness in a patient by stimulating the median nerve and associated nerve structures in the wrist P6 acupuncture point of the patient with electrical therapy.
- 7. (Currently Amended) A method of relieving dizziness in a patient comprising the steps of:

applying electro-acupuncture device to the wrist $\underline{\text{over the}}$ $\underline{\text{P6 acupuncture point}}$; and stimulating the $\underline{\text{wrist}}$ $\underline{\text{P6 acupuncture}}$ point with the electro-acupuncture device.

8. (Original) A method of relieving vertigo in a patient comprising the steps of:

mounting a non-invasive nerve stimulation device onto to the ventral side of the wrist;

generating a stimulation signal; and

delivering the stimulation signal to the ventral side of the wrist.

9. (Original) A method of relieving vertigo in a patient comprising the steps of:

mounting at least one electrode onto the ventral side of the wrist;

generating a stimulation signal; and

delivering the stimulation signal to said at least one electrode to stimulate the ventral side of the wrist.

- 10. (Original) The method of claim 9 wherein said mounting step includes providing A wristwatch-like housing carrying the electrodes, and providing securing means for mounting the housing onto the wrist, with the housing having A circuit means for generating the stimulation signal encased within the housing.
- 11. (Original) The method of claim 9 wherein said delivering step comprises delivering an intermittent stimulation signal.
- 12. (Original) The method of claim 9 wherein said delivering step comprises delivering continuous stimulation signal.
- 13. (Currently Amended) A method of relieving vertigo in a patient by stimulating the median nerve and associated nerve structures in the wrist P6 acupuncture point of the patient with electrical energy.
- 14. (Currently Amended) A method of relieving vertigo in a patient comprising the steps of:

applying an electro-acupuncture device to the wrist $\underline{\text{over}}$ the P6 acupuncture point; and stimulating the [wrist] $\underline{\text{P6}}$ acupuncture point with the electro-acupuncture device.
